

## The Cognition Challenge: Building a Tower

Reflection: Think about the activity. Apply 5 of the following words to your thinking. Explain how that word relates to the activity.

|                      |                        |                       |
|----------------------|------------------------|-----------------------|
| Insight              | Representativeness     | Convergent thinking   |
| Confirmation bias    | heuristic              | Divergent thinking    |
| Fixation             | Availability heuristic | Dunning-Kruger Effect |
| Mental set           | Overconfidence         | Anchoring             |
| Functional fixedness | Belief perseverance    | Language              |

| Word 1 | Definition | Application to the Challenge |
|--------|------------|------------------------------|
|        |            |                              |

| Word 2 | Definition | Application to the Challenge |
|--------|------------|------------------------------|
|        |            |                              |

| Word 3 | Definition | Application to the Challenge |
|--------|------------|------------------------------|
|        |            |                              |

| Word 4 | Definition | Application to the Challenge |
|--------|------------|------------------------------|
|        |            |                              |

| Word 5 | Definition | Application to the Challenge |
|--------|------------|------------------------------|
|        |            |                              |

How would this activity have been more difficult if you had damage to Wernicke's Area?  
Why?
